OSD Port utilization: D: 15% U: 1% Packet error: 0 | I2C error: 0 | Cycle Time: 501 | CPU Load: 7% 3. Instructions of the functions of the camera and assigning transmitter channels to them In the Flight Controller Configurator, navigate to the Modes tab. There are new CAMERA WI-FI, CAMERA POWER and CAMERA CHANGE modes. • CAMERA WI-FI: turn on/off the WIFI of the camera. When in the OSD of the camera, this is used to confirm your selection. • CAMERA POWER: start/stop the video. When in the OSD of the camera, this is used to move to the next menu item. CAMERA CHANGE MODE: switch among the three modes, video, photo and OSD setting mode. When in the OSD of the camera, this will exit the menu. Assign any available channel to the function you need, for example:

5. Test

Assign the AUX2 to the CAMERA POWER, range 1900-2100

• Assign the AUX3 to the CAMERA CHANGE MODE, range 1900-2100

Port utilization: D: 13% U: 2% Packet error: 0 | I2C error: 0 | Cycle Time: 510 | CPU Load: 7% 4. Assign the channel to the switch of the controller Please choose your Model on the controller, then access to the Inputs interface and assign the channel to the switch of the controller. Take opentx 2.2.0 for example, assign the channels AUX5, AUX6 and AUX7 to sa, sb and sd respectively. DIGITAL TELEMETRY RADIO SYSTEM

Power the Flight Controller and the RunCam Split

• Set the SA to the bottom, the camera starts/stops the video

• Set the SB to the bottom, the camera turns on/off the WIFI

Lens module connection diagram

**Basic Camera Operation** 

Long press the Power/Shutter button

Camera Status Light: Blue (LED 3)

Camera Status Light: Green (LED 2)

Camera Status Light: Orange (LED 4)

Short press the WiFi/Mode Switch button

After powering on, long press the WiFi/Mode Switch button to cycle

through the three modes: Video/Photos/OSD settings.

• Press the Power/Shutter button to start/stop recording.

• Press the Power/Shutter button to capture photos.

• Press the Power/Shutter button to move to a setting.

Simultaneously press the Power/Shutter button and

standby mode, the function of the WIFI/MODE SWITCH button doesn't change.

• Long press the WiFi/Mode Switch button to exit the menu.

In standby mode, press the WiFi/Mode Switch button three times in rapid

succession (within 2 seconds). When resetting is complete, the status

light (orange) blicks twice, and the camera automatically shuts down.

• Press the WiFi/Mode Switch button to select.
